# Custom Imprinted Watches

## 2005:2006

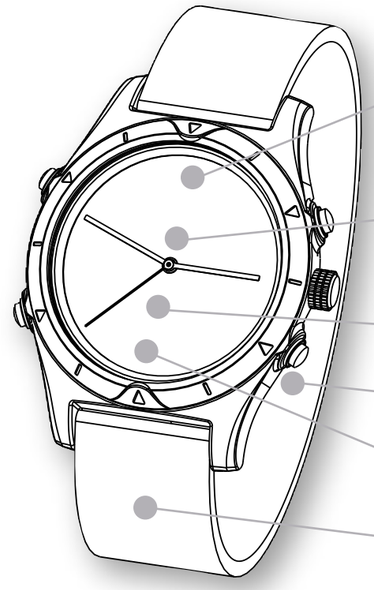
# 150 years of timekeeping innovation

The consistent themes that have driven Timex every moment for more than 150 years are vision and innovation. Vision gives the company an understanding of what people truly want and expect from its products. Innovation helps find new and better ways to meet — and then exceed — expectations.

Displayed within the pages of this catalog is a remarkable array of timepieces to suit the needs of nearly every conceivable lifestyle. From the exciting new Perpetual Calendar collection to Sport styles with more sophisticated features than ever before, the themes of vision and innovation are more evident than ever.

## Customizing Techniques

Place your logo prominently onto the face of the dial or any other ways listed below.



1

### Dial imprint

Printing on the dial for analog watches, or under the lens on digitals, provides a constant awareness of a company or brand name.

2

### Embossed applied logo and markers

Embossed applied logo and markers adhere to the watch face for the look of an upscale engraved medallion dial.

3

### Dial cut-out design

A dial cut-out technique has an added effect in low light situations. With a push of a button the logo is backlit with INDIGLO® night-light, resulting in an entirely new look.

4

### Clasp engraving

Clasps or buckles on metal bands may be customized with a laser etching process.

5

### “Hidden image”

A company logo, or another message may be revealed when the INDIGLO® night-light is activated using the Timex “hidden image” graphic process.

6

### Strap imprint

Straps are another place to custom imprint — separately or in conjunction with a dial or lens imprint.

## The Date Is Always Right!

The Perpetual Calendar Collection

### Perpetual Calendar ›

- The date is always right!
- INDIGLO® night-light

# Timex® Bodylink® System

The Timex® Bodylink® system offers athletes and fitness enthusiasts the unprecedented ability to track, store and analyze several key indicators of personal performance. Using the very latest in digital technology, the Bodylink® system is a network of up to 4 devices worn on the body that act together as a single information and sport monitoring system. The Timex® IRONMAN* Triathlon® Bodylink® performance monitor is the essential element to the Bodylink® system by providing real-time workout data. It teams with the Timex® Digital Heart Rate sensor and the Timex® Speed + Distance sensor to simultaneously provide comprehensive performance feedback.

## TIMEX® BODYLINK® SYSTEM COMBINES SPEED + DISTANCE AND HEART RATE MONITOR FEATURES

### SPEED + DISTANCE FEATURES:

**EXACT SPEEDS†**
Measures your real-time speed, average speed and maximum speed.

**EXACT PACE†**
Calculates your pace, average pace and best pace.

**EXACT DISTANCE†**
Tracks your workout distance and gives target distance alerts.

**CONTINUOUS ODOMETER**
Keeps track of your total distance for a workout or group of workouts.

**HANDS FREE OPERATION**
Start, stop and take splits automatically based on distance, speed or time.

**DIGITAL TRANSMISSION**
Timex's system offers clear signals around exercise equipment and power lines.

† Product claims: Distance accuracy is typically better than 95% in most environments, and better than 99% in environments which offer a clear view of the sky.

Speed, Heart Rate, Lap

Pace, Heart Rate, Distance

Speed, Heart Rate, Distance

### HEART RATE MONITOR FEATURES:

**MEMORY RECALL**
Allows you to review accumulated performance data.

**DIGITAL TRANSMISSION**
Timex's system offers clear signals around exercise equipment and power lines.

**TARGET ZONES**
Preset your desired heart rate exercise zone. Alarm notification when you are not in zone.

**AVERAGE HEART RATE**
Displays your average heart rate over a period of time.

**TIME IN ZONE**
Amount of time spent within your selected heart rate target zone.

**ZONE ALERTS**
Watch will alert you when you are outside your defined speed, pace or distance zone.

Data Recorder compatible
